

THREADING Threading is an ancient and delicate method of hair removal that originated in the East. Threading's precise method of control makes it ideal for shaping eyebrows. This method eventually causes hair re-growth to weaken in time, without damaging hair follicles. Threading can also tackle hair on other areas of the face as well because it is much gentler on the skin.

MICRODERMABRASION \$89

Microdermabrasion is a cosmetic technique aimed to remove the topmost layer of the skin to create a rejuvenated effect and treat common skin problems such as acne scarring, mild discoloration, sun damage, wrinkles and even more severe problems such as melanoma and hyperpigmentation. We highly recommend using the dermalogica formulations SPF 30+ products immediately after your treatment to prevent getting sunburnt.

NANO NEEDLING \$150

Nanoneedling cleans the top layer of your skin, stimulates and removes debris. It uses extremely tiny stainless steel cones that do not penetrate the skin but aid in product infusion and skin renewal.
